The PUBLIC SECTOR I.T. Leadership Sessions

Presented by Kiefer Consulting

Join Kiefer Consulting for a session that tackles the topics that state and local government I.T. leaders are most interested in. Our first session tackles 3 topics that are top of mind for CIOs, CTOs and Directors in the public sector. Each segment will provide practical and actionable advice that will help your organization address the new challenges and opportunities presented by new technologies.

SESSIONS:

Data Analytics & Leveraging Data: The 5 Things All IT Leaders NEED to Know

Presented by Scott Roberts

Five things IT leaders should know about leveraging data and creating an approach that allows your organization to make data-driven decision, discover trends and create a data culture within your organization. Scott will show a few examples from the Kiefer Data Analytics and Visualization Practice Group.

The Future of Collaboration: The Trends and How to Stay Ahead of Them

Presented by Peter Allen

Get an introduction to the tools and approaches that are revolutionizing the public-sector and creating a modern digital workplace. Peter will share trends and technologies that are changing how people work and allowing organizations to ditch legacy paper-based and manual processes in favor digital workflows.

Business Transformation Takes Guts: Leveraging Against the Objections of Change

Presented by Andy Coyle

Many organizations want to transform and adopt digital processes, but there are a lot of things standing in the way. In this session learn how organizations leverage against objections and barriers to bring new levels of collaboration and efficiency to an organization focused on transformation.
