Empowered by Power BI

As organizations move to Office 365, they will discover a powerful application called Power BI. Power BI allows users to perform self-service BI and create dynamic visualizations that help you interpret complex data and make better decisions.

////////////////

What is Power BI?

Power BI is a suite of business analytics tools to analyze data and share insights. Monitor your business and get answers quickly with rich dashboards available on every device.

Power BI dashboards provide a 360-degree view for business users with their most important metrics in one place, updated in real time, and available on all of their devices.

Over 20 Stunning Visualizations

With over 20 built-in visuals and a vibrant community of custom visualizations, create stunning reports that communicate your message effectively.
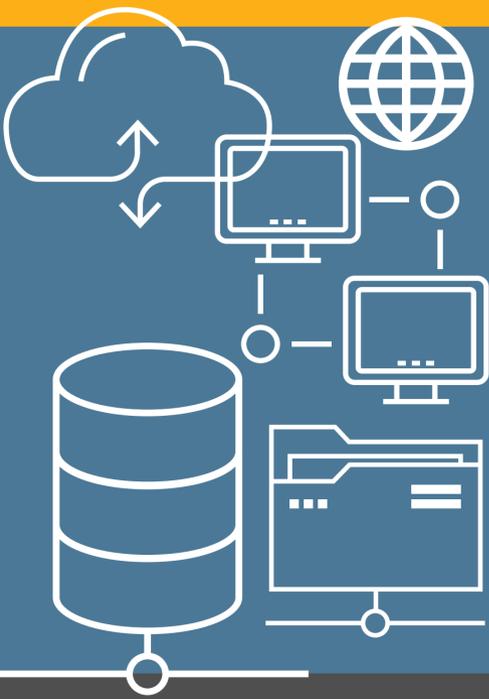

////////////////

Are you a Data Analyst?

If you are a data analyst delivering reporting and analytics to your organization, Power BI lets you be productive and creative with what you build. Power BI Desktop is a feature-rich data mashup and report authoring tool. Combine data from disparate databases, files, and web services with visual tools that help you understand and fix data quality and formatting issues automatically.

////////////////

Bring Data Together. Bring Data to Life.

Power BI can unify all of your organization's data, whether in the cloud or on-premises. Using the Power BI gateways, you can connect SQL Server databases, Analysis Services models, and many other data sources to your same dashboards in Power BI. If you already have reporting portals or applications, embed Power BI reports and dashboards for a unified experience.

////////////////

Allow secure access to data & reports

With the Power BI service, publish reports securely to your organization and set up automatic data refresh so everyone has the latest information.

50 Connections to popular business applications

Creating a dashboard is simple thanks to over 50 connections to popular business applications, complete with pre-built dashboards crafted by experts that help you get up and running quickly.

Business Intelligence On the Go

Access your data and reports from anywhere with the Power BI Mobile apps, which update automatically with any changes to your data.

Check out our website to see what we've been doing to help clients with Office 365, SharePoint, and moving to the cloud.

We have a team of business intelligence experts that understand what it takes for a successful deployment of a business intelligence solution.
